The NORTH
SHORE

ORCHID
BULLETIN

Correspondence & membership enquiries to: The Hon. Secretary
P.O. Box 212, Forestville, NSW 2087, Australia. northshoreorchidsociety@gmail.com

Website <https://northshoreorchidsociety.org/>

Next Meeting is on Wednesday 1st February commencing at 8pm, at the Forestville Memorial Hall, 3 Starkey St, Forestville. Members may enter the hall and bench plants from 7.00pm.

This month the culture class will be given by Gloria Cushway who will be showing us how she pots up her large and very beautiful exhibition cattleyas. This is a great opportunity to learn from the expert.

The guest speaker will be Bailey Wong who will take us through how she grows her amazing orchids. Bailey's orchids are grown completely inside with temperature, humidity and light all artificially controlled. This is sure to be a fascinating talk.

Reminder – Members, please make sure you sign in on arrival as this is an insurance requirement of the society. We still prefer members to be double vaccinated and while masks are not mandatory, they are recommended.

New Member - a warm welcome to our newest member, Jie Zhang. We hope you enjoy your membership of the Society. For any advice, just ask one of the committee or any member wearing a name badge and they will point out a committee member to help you.

Tea Roster – This month the supper table helpers will be Susie Butler, Elizabeth Blackwell and Clover Bradley. Thank you, ladies, for volunteering. Please remember to bring in your own cups as Styrofoam cups are no longer available.

ANNUAL SUBSCRIPTIONS ARE NOW DUE

Annual subscriptions are due on 1st January. The fees are \$16.00 per single member and \$18.00 per couple or family membership. Fees may be paid to the Treasurer at our monthly meeting, or by mailing to our Post Office Box 212, Forestville, 2087 or by direct credit straight into North Shore Orchid Society's account BSB 082 201 Account No. 509021920, using your name as the reference. If you use internet banking please send an email to the Treasurer Anthony Mobbs at anthonymobbs@yahoo.co.uk confirming your payment. Members who joined last year do not have to pay the annual subscription this year as it is included with their fees already paid. If you are not sure whether you are up to date, please contact Anthony.

A final reminder to all those who benched plants last year to pick up their prize plant at the February meeting. The Point Score Competition results were printed in the January bulletin. If you will not be at the meeting, please arrange for someone to pick it up for you.

The North Shore Orchid Society Inc, disclaims all responsibility for any loss or damage that may be attributed to the use or misuse of information printed in this bulletin

MARCH MEETING

The Society's AGM will be held at the March meeting. If you would like to help your Society, you are invited to do so by joining the very active Committee. A nomination form is included with this bulletin. Just fill it in and send it to the Secretary, Clover Bradley.

Also at the March meeting we will be holding the first of our twice a year Members' Auction. You may bring in up to four plants per membership for auction. The form required to be submitted will be included with the March bulletin.

Handy hint – fill in your benching cards at home before you come to a meeting. If you are not sure of the class number, it is then just a quick job to fill it in at the meeting.

Orchid of the month – the Stanhopea (*the upside-down orchid*)

Many members have reported that the summer season this year has seen exceptional flowering of this very popular orchid. Why this is so may have something to do with the very wet conditions that were experienced for much of 2022. Whatever the reason, Stanhopeas are filling our gardens now with their very strong perfume of vanilla and chocolate. In the coastal areas of much of NSW a number of these orchids can be grown outside in the garden, hung on a tree which gives them light shade for much of the year.

There are estimated to be around 55-60 different species (the number differs according to which reference you consult) and they are native to Mexico, Central America and south to Venezuela. There are different species that grow from sea level to about 4000m elevation and about 20 of these are cool growing and suitable for growing outside in our area.

Stanhopeas in their natural setting are epiphytes and live on trees and rocky slopes so although they are easy to grow, they have some very specific requirements. Because the flowers force their way downwards from the surface pseudobulb, they need an orchid mix that will allow this movement. A popular mix is medium pine bark to which can be added some large perlite or shredded sphagnum moss for extra moisture retention. Because the flowers will emerge from the base of the container, they must be able to get through. The ideal container is therefore a wire basket that is shallow rather than deep and which can be lined with substances that can be easily penetrated by the flower such as sheets of paperbark, coconut fibre or sphagnum moss. (Beware of the commercial coconut fibre liners as they contain a plastic coating.) Once filled, this basket can be hung either outside in a tree or fairly high in an orchid house.

The care of your Stanhopea is much the same as for most of your orchids – keep it well watered in the warmer months and ease off during winter. It can be fertilised with a suitable orchid liquid feed or some of the pelleted fertilisers that you use in the garden can be lightly sprinkled on during the spring and summer growing season. Splitting up and repotting should ideally take place soon after flowering. It is important not to split up the pseudobulbs too much as the plant will take much longer to reflower in subsequent years.

There are some disadvantages to growing this orchid. The first is that each flower only lasts approximately three days before it fades and dies. The second is that to get that 'wow' factor, your plant needs to be grown to quite a large size. Both these factors are reasons why we do not often see on the Show Bench some of the spectacular flowering that this orchid is capable of.

If this has sparked your interest, plants can be obtained at orchid fairs, auctions, club sales bench or even garage sales.
